Preface

The Job Accommodation Network (JAN) is funded by a grant from the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office <https://www.loc.gov/copyright>. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 09/12/2022.

JAN'S Accommodation and Compliance Series

Introduction

JAN's Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN's Searchable Online Accommodation Resource (SOAR) at <https://AskJAN.org/soar>.

Information about Tourette Syndrome

Tourette Syndrome (TS) is a neurological disorder that is characterized by brief, sudden, repetitive, and unusual involuntary movements or unwanted sounds called tics. Symptoms can range from mild to severe to debilitating.

The tics associated with TS are classified as either simple or complex. Simple tics involve a limited number of muscle groups. Some of the more common simple tics include eye blinking, nose twitching, mouth movements, and head / shoulder shrugging or jerking. More complex tics involving several muscle groups and may include facial grimacing combined with a head twist and a shoulder shrug, touching objects, hopping, jumping, bending, or twisting. Simple vocalizations might include repetitive throat-clearing, sniffing, or grunting sounds. More complex vocal tics include repeating words or phrases, sometimes obscene or swear words. More intense symptoms may considerably impede communication, daily functioning and quality of life.

Symptoms of TS usually begin in childhood and can be seen as early as two years of age, but are more likely to occur between the ages of six to seven. Males are three to four times more likely than females to develop TS. In most cases, the severity, frequency, and disruptiveness of the symptoms diminish during adolescence and adulthood. In other cases, the symptoms actually disappear entirely, usually by early adulthood. Rarely will the symptoms worsen in adulthood.

Many individuals with TS experience additional related conditions such as attention deficit/hyperactivity disorder (ADHD), obsessive-compulsive disorder (OCD), learning disabilities, sleep disorders, and anxiety and mood disorders. JAN's [Accommodation Solutions: Executive Functioning Deficits](#) is a publication detailing accommodations for

individuals with limitations related to executive functioning. These ideas may be helpful in determining accommodations.

Tourette Syndrome and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see [How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act \(ADAAA\)](#).

Accommodating Employees with Tourette Syndrome

People with Tourette Syndrome may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people who are aging will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee's job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
6. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Attentiveness/Concentration

- Alerting Devices
- Alternative Lighting
- Applications (apps)
- Apps for Memory
- Behavior Modification Techniques
- Calendars and Planners
- Cubicle Doors, Shields, and Shades
- Electronic Organizers
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Full Spectrum or Natural Lighting Products
- Job Coaches
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Noise Canceling Headsets
- Personal On-Site Paging Devices
- Professional Organizers
- Sound Absorption and Sound Proof Panels
- Task Separation
- Telework, Work from Home, Working Remotely
- Timers and Watches
- Uninterrupted "Off" Work Time
- Verbal Cues
- Visual Schedulers
- Worksite Redesign / Modified Workspace
- Written Instructions

Disruptive Behavior

- Apps for Miscellaneous Mental Health / Control of Anger & Emotions
- Behavior Modification Techniques

- Counseling/Therapy
- Cubicle Doors, Shields, and Shades
- Disability Awareness/Etiquette Training
- Employee Assistance Program
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Habit Monitoring
- Job Coaches
- Job Restructuring
- Noise Canceling Headsets
- On-site Mentoring
- Periodic Rest Breaks
- Reminders
- Social Skill Builders
- Strobe Lights
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
- Training Modifications
- Worksite Redesign / Modified Workspace
- Written Instructions

Executive Functioning Deficits

- Apps for Concentration
- Apps for Memory
- Calendars and Planners
- Checklists
- Color Coded System
- Cubicle Doors, Shields, and Shades

- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Extra Time
- Flexible Schedule
- Form Generating Software
- Full Spectrum or Natural Lighting Products
- Job Coaches
- Job Restructuring
- Marginal Functions
- Memory Software
- Modified Break Schedule
- Noise Canceling Earbuds
- Noise Canceling Headsets
- On-site Mentoring
- Recorded Directives, Messages, Materials
- Reminders
- Sound Absorption and Sound Proof Panels
- Speech Recognition Software
- Sun Boxes and Lights
- Sun Simulating Desk Lamps
- Timers and Watches
- Written Instructions

Non-compliant Behavior

- Apps for Miscellaneous Mental Health / Control of Anger & Emotions
- Behavior Modification Techniques
- Counseling/Therapy
- Cubicle Doors, Shields, and Shades
- Disability Awareness/Etiquette Training
- Employee Assistance Program
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines

- Flexible Schedule
- Habit Monitoring
- Job Coaches
- Job Restructuring
- Noise Canceling Headsets
- On-site Mentoring
- Periodic Rest Breaks
- Reminders
- Social Skill Builders
- Strobe Lights
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
- Training Modifications
- Worksite Redesign / Modified Workspace
- Written Instructions

Organizing/Planning/Prioritizing

- Applications (apps)
- Apps for Organization/ Time Management
- Calendars and Planners
- Color-coded Manuals, Outlines, and Maps
- Electronic Organizers
- Ergonomic Equipment
- Job Coaches
- Job Restructuring
- On-site Mentoring
- Organization Software
- Personal On-Site Paging Devices
- Professional Organizers
- Reminders

- Supervisory Methods
- Task Identification
- Task Separation
- Timers and Watches
- Visual Schedulers
- Written Instructions

Stress Intolerance

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Supervisory Methods
- Support Animal
- Support Person

Work-Related Functions

Policies

- Additional Training Time / Training Refreshers
- Aide/Assistant/Attendant
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Marginal Functions
- Modified Break Schedule
- Periodic Rest Breaks
- Physical/Social Distancing Signage
- Policy Modification

- Reassignment
- Service Animal
- Sleep Alerting Devices
- Strobe Lights
- Supervisory Methods
- Support Animal
- Telework, Work from Home, Working Remotely
- Touchless Faucets

Stress

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Coaches
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Monitor Mirrors
- Odor Control
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Strobe Lights
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
- Uninterrupted Work Time

Situations and Solutions:

A library employee who had several fairly severe motor tics very rarely had vocal ones because of Tourette Syndrome.

After demonstrating one of his rare outbursts, his employer requested medical documentation in order to ascertain the nature of the outbursts and whether they would be an issue in the future. The employer was able to determine that the outbursts were rare indeed, that there really was no accommodation to help reduce them, and that they could handle the outbursts as outlined by the employee's doctor.

A parks and recreation worker with Tourette Syndrome worked for a city and had difficulty controlling his vocal tics when he was under the stress and chaos of working with a crew of more than three people.

He asked for the accommodation of allowing him to work alone, or with just one other co-worker. Although transportation became a little tricky to organize, his employer found no hardship in providing the accommodation for a trial period to see how effective it could be.

An insurance salesman, working in a call center, had Tourette Syndrome that was getting more severe.

No longer able to control his vocal outbursts, it became impossible for him and his coworkers to complete calls. When it was brought to his attention, he shirked it off as his co-workers being too difficult to get along with. He refused to take part in the accommodation process, and refused the move to a more private area with frequent breaks to help him manage the stress that he stated was exacerbating his condition. With no assistance from medical documentation as he refused to cooperate, the employer determined that he was no longer qualified for the position as he was unable to complete the essential functions of his position.

An employer who had just hired a new employee with Tourette Syndrome was shocked when he discovered that the employee was making sexually offensive comments to female coworkers as well as passing around lewd pictures he had drawn.

Meeting immediately with the employee and his job coach, the employer discovered that the employee had Tourette syndrome, had experienced the same issues in previous positions, and was unable to refrain from the comments and the drawings due to his Tourette's. Since no accommodation had previously been found to be effective, the employer terminated this employee.

Due to Tourette Syndrome an office employee had vocalizations that disturbed his co-workers.

He asked for a stress-free environment in order to reduce the vocalizations. In order for his employer to reduce or eliminate stress, he had to know specifics. The employee was able to explain the day-to-day issues that caused his stress to escalate so the employer could work with him to help reduce it. Effective accommodations included projects with

detailed instructions, noise-canceling earbuds to help eliminate conversations/ distractions around him, and the ability to take short flexible breaks.

Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at <https://AskJAN.org/soar> is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
